JUNE 3ᴿᴰ, 2023

1701 Centerview Dr,
Little Rock, AR
72211
Ernst & Young

DEAR ERNST & YOUNG

I am pleased to have this opportunity to apply for the Ernst & Young Internship to become a developer/designer. I have completed my two years of college attending Pulaski Technical College where I receive an Associate Degree in Art and Liberal Science. Now I am pursuing BA in Web Design and Development.

From the start of college, I have learned more and more about the importance of web design to be able to provide my business with sales growth and improve sales. The knowledge I gained allowed me to create websites from scratch and to be able to work with clients to promote their company products.

Your internship description states that you're seeking a professional eager to learn, teach and mentor all as one. Your key responsibilities list to be focus on the development, customization, and optimization of Oracle Utilities software within the Oracle Utilities Application Framework. Your skill for this internship includes designing, and developing Java, Groovy, and application scripting objects with supporting configuration for the application to meet all client's needs.

I have the skills and experience as well as the requirements needed for Ernst & Young Internship. I have increased knowledge on technical writing, my communication skills, and many more that will help me be a great candidate for the internship opportunity.

I look forward in getting further information on this position to be a part of Ernst & Young Internship. I am attaching my resume for your review. If you need to reach out to me by chance my information is listed above. Again, thank you for this opportunity and I can't wait to hear from you all.

Sincerely,

Makayla Johnson

Enclosure: Resume

MAKAYLA JOHNSON

Little Rock, AR | 501-412-3451 | mjjohnson4@ualr.edu | makaylaj@gmail.com
